Mr. Ron Waller
U.S. Army Corps of Engineers
Louisville District
P.O. Box 59
Attn: ORLOR-R/Ron Waller
Louisville, KY 40201

Dear Mr. Waller:

Summaries of the 1983-2004 gypsy moth trapping program conducted at four Army Corps of Engineers sites within the Louisville District are enclosed for your information (Table 1). Also enclosed are maps showing the trap locations at each site (Figures 1a-1d). The purpose of the trapping program is to monitor low-level gypsy moth populations and to help determine when more intensive survey methods should be employed.

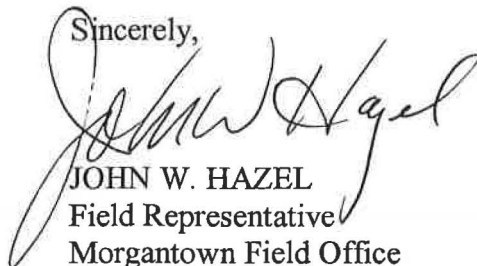

West Fork Lake trapped four male gypsy moths. Total trap catch at Clarence J Brown Dam increased to 17 moths in 2004. Zero gypsy moths were trapped at Caesar Creek Lake and William Harsha Lake. Based on these results, gypsy moth populations will not impact the forest resources at these Corps sites in the immediate future.

Also enclosed are Figures 2a-2d which show the 2004 gypsy moth Slow-the-Spread (STS) trapping results in Ohio. The inserts on each Figure show close-ups of the STS results in relation to the four Corps site properties. For more information regarding the STS program, visit <http://www.gmsts.org>.

It is important for Corps personnel to look for other gypsy moth life stages while performing their normal duties. Visit our GM web site located at <http://na.fs.fed.us/wv.gmdigest> for publications that are helpful in identifying the different gypsy moth life stages.

We would like to continue the trapping program at the same intensity in 2005. Thank you for your continued cooperation and if you have any questions regarding these results, please call Karen Felton at (304) 285-1556.

Sincerely,

JOHN W. HAZEL
Field Representative
Morgantown Field Office
